

Reggie

Reggie came to live with us on February 10, 2013 and he has been a joy since day one! After loosing our 13-year old Dalmatian, Sami, last September we decided on an older Dalmatian to join our 16-year old Frankie who seemed just plain lonely without another canine friend in the house.

Reggie met Frankie and it was an instant connection! They loved each other, and immediately there was a hop in Frankie's step. They now explore the backyard together and have gotten into quite the feeding and backyard routine. He loves to take walks on the trail system we have behind out house. Reggie has even warmed up to our resident cat, 18-year old Dempsey!

As for us, we love him! He warmed to us immediately and takes his place frequently on one of the sofas. It's more like who can get the best spot first between he and my husband, Randy! Randy has definitely lost his favorite sofa spot... Reggie seems to win more of those contests! He has also figured out the fine art of moving the pillows to suit his needs... as a comfortable headrest while he naps!

Never having used stairs in his life, he can now navigate a flight of steps. He's like a gazelle going up, but, going down is... well... a different story! Definitely a little awkward on the downward approach! He's also mastered the dog doors and makes his way in and out as he needs to on his own schedule!

As for me, I have a constant companion at my feet while working from home, which I do part of the week. He definitely decides when it's time for me to stop typing on my computer and pay more attention to him. He makes his demands, smiles and wags his tail, then retreats to the sofa closest to my workspace! Always in my sights!

We feel most grateful and lucky to have found such a sweet and kind soul to be a part of our family, and bring joy not only to us but a companion to our sweet 16-year old, Frankie.
