

# Josie and Olive

(aka Josie1 and OliveA)

---

*Josie is our second Dalmatian. Luna was our first, we had her for 17 years. We knew we loved Dals and wanted another. Josie came to our house April, 29, 2012 scared, insecure and with separation anxiety! Our first couple of days were quite interesting, but we love her from the day we set eyes on her. Josie is gentle, sweet, kind and such a lady. Our biggest concern was if she would get along with our cats, she completely ignored them. Josie loves walks, swimming, car rides and being loved. Josie is exactly what we needed in our lives so she rescued us too. In September we decided to get Josie a friend, and we saw Olive on the rescue site. We took Josie with us to meet Olive to see how they got along, and we took Olive home with us. Now we have two sweeties in your home.*

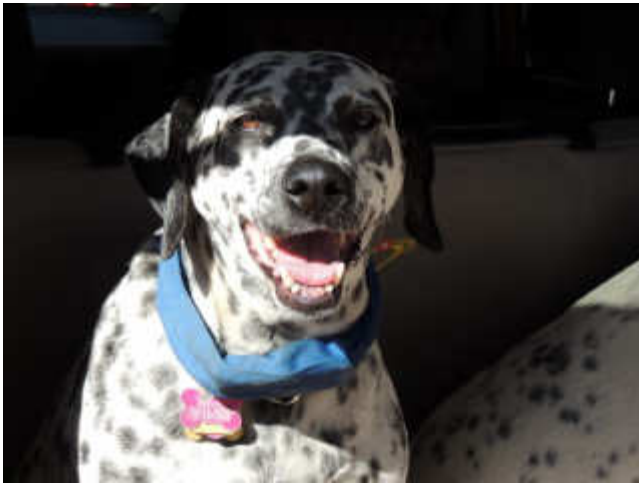

*The girls love to go on walks together especially to the park where there is a baseball field that is completely enclosed. They can be off leash and run as fast as they can on the grass. The girls make sure that trip to the field is on the calendar at least twice a week. On a daily basis the girls take Tom on a walk after work so he can relax and they can show him all the great smelling stuff around the house they*

*lovingly call it a 'sniff' walk. At least 4 times a week the girls also go to the local dog park where they can be off leash as well. Josie being the oldest, has decided that she is there to protect Olive when other dogs 'play too hard'. The girls have lots of dog mats, one for each one in several places in the house, yet they always choose to sit as close together as possible on one mat.*

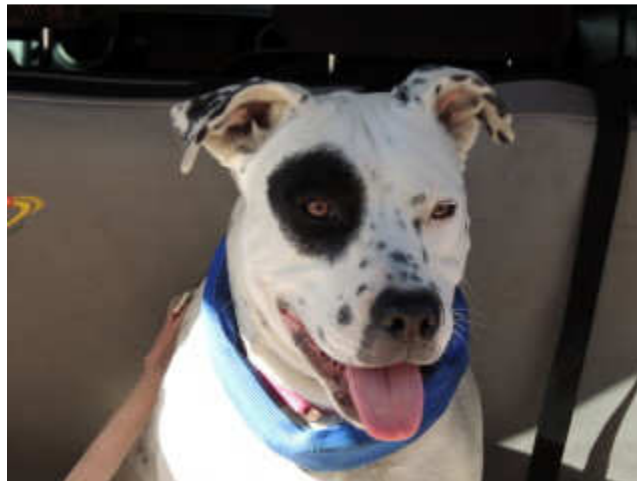

*We are so happy that our family is whole and full with our two new girls.*

*Nadine and Tom C.  
Colorado Springs, CO*
