

Sparky & Trixie (Aka Nick & Aubrey)

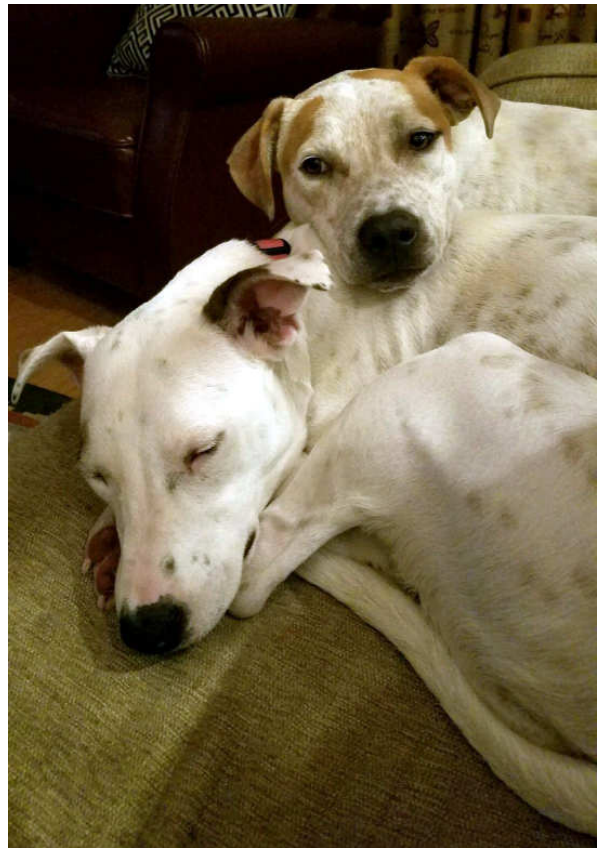

In April of 2016 we had to say goodbye to our faithful Zoey dog who lived a wonderful life of 13 years. In August of the previous year we also lost her (and our) best pal, Joey who lived to 14. They were both wonderful Dalmatians and constant companions from 2004 on when we rescued Zoey to join Joey and our family. Since they grew up together we knew when we were ready that we wanted to get a pair again. This past Fall we learned about a sweet young girl named Aubrey from the Dalmatian Rescue of Colorado site. When we inquired about her we learned that she had a brother named Nick but that when they were rescued in Texas and brought to Colorado they went to separate foster homes. We met Aubrey first and fell in love with her inquisitive and loving nature. She seemed to love us too right away. We next met Nick who was very shy. We were told that he seemed to miss his sister and we were hopeful that reuniting them would bring out his playful side. On October 15 we picked up Aubrey first from Holly in Greeley. Then after a quick drive to Beth White's farm, Nick and Aubrey were reunited! They were so happy to see each other and have been inseparable since. We changed their names since we already have a human named Nick in the family. So after a week or so of watching their funny personalities emerge we landed on Sparky and Trixie. They have brought so much joy and love into our home and are both very well-behaved. They enjoy chasing each other in our back yard, cuddling together every chance they get, and going for daily visits to make new friends at the nearby dog park. Sparky has come out of his shell though he's still a bit more reserved than his sister. We are looking forward to many fun times ahead with Sparky and Trixie and we thank Dalmatian Rescue of CO and all its many volunteers for the work they do for all the furry friends out there.

Nick, Maggie, and Katie V.
Erie, Colorado

They like hanging out in the sun taking a nap

They truly are a bonded pair
